

Chandos Information Professional Series

Finding the Concept, Not Just the Word: A librarian's guide to ontologies and semantics

Brandy E. King and Kathy Reinold

CHANDOS PUBLISHING

Contents

<i>About the authors</i>	ix
<i>Preface</i>	xi
Introduction	xv
Conducting a reference interview	xv
Executing the search	xvi
Presenting the answer	xix
But what if...?	xix
PART 1: UNDERSTANDING ONTOLOGIES	1
1 Organizing knowledge	3
What is an ontology?	7
How are ontologies different from other knowledge representations?	8
How are ontologies currently being used?	12
Key concepts	12
2 Ontologies in semantic search	15
Determining whether a search was successful	15
What does semantic search have to offer?	22
Semantic techniques	22
Semantic searching behind the scenes	27
Key concepts	33
3 Creating an ontology	35
How to create an ontology	35
Key concepts	51

4	Building an ontology from existing components	53
	Choosing components	53
	Customizing your knowledge structure	55
	Key concepts	64
	PART 2: SEMANTIC TECHNOLOGIES	65
5	Natural language processing	67
	Tagging parts of speech	69
	Grammar-based NLP	71
	Statistical NLP	74
	Semantic analysis	77
	Current applications of NLP	77
	Key concepts	78
6	Using metadata to add semantic information	79
	Structured languages	79
	Metadata tagging	83
	Semantic tagging	85
	Key concepts	88
7	Other semantic capabilities	89
	Semantic classification	89
	Synsets	91
	Topic maps	92
	Rules and inference	94
	Key concepts	96
	PART 3: CASE STUDIES: THEORY INTO PRACTICE	99
8	Biogen Idec: using semantics in drug discovery research	101
	Biogen Idec's solution	104
	The future	106

9	The Center on Media and Child Health: using an ontology to explore the effects of media	109
	Building the ontology	113
	Choosing the source	113
	Implementing and comparing to Boolean search	119
	The future	120
10	Partners HealthCare System: semantic technologies to improve clinical decision support	123
	The medical appointment	124
	Partners HealthCare System's solution	126
	Lessons learned	132
	The future	135
11	MINDSWAP: using ontologies to aid terrorism intelligence gathering	137
	Building, using and maintaining the ontology	139
	Sharing information with other experts	145
	The future	146
	PART 4: ADVANCED TOPICS	147
12	Languages for expressing ontologies	149
	XML	150
	RDF	152
	OWL	155
	SKOS	155
	Ontology language features – comparison chart	158
13	Tools for building ontologies	165
	Basic criteria when evaluating ontologies	168

PART 5: TRANSITIONS TO THE FUTURE	171
14 Challenges and opportunities: using semantics today	173
Challenges	174
First steps toward achieving the vision	179
Appendix	181
Bibliography	189
Index	199
