List of Illustrations	ix
Preface	xv

## **Part I. Fundamentals of Metadata**

---

Chapter 1. Introduction	3
1.1 A Brief History	4
1.2 Definitions	7
1.3 Types and Functions	8
1.4 Principles	9
1.5 Anatomy of a Metadata Standard	11
Suggested Readings	13
Chapter 2. Current Standards	15
2.1 Metadata for General Purposes	16
2.1.1 Dublin Core (DC)	17
2.1.2 MODS and the MARC Family	23
2.2 Metadata for Cultural Objects and Visual Resources	32
2.2.1 Introduction to CDWA	32
2.2.2 Important Concepts	34
2.2.3 The Element Sets of CCO, CDWA Lite, and VRA Core	36
2.3 Metadata for Educational Resources	42
2.3.1 Metadata Needs for Educational Resources	43
2.3.2 IEEE-LOM	44
2.3.3 CanCore	48
2.3.4 Gateway to Educational Materials (GEM) 2.0	49
2.3.5 Dublin Core Education Application Profile (DC-ED)	50
2.3.6 SCORM	51
2.4 Archival and Preservation Metadata	52
2.4.1 The Encoded Archival Description (EAD)	53
2.4.2 Metadata for Digital Preservation	59
2.5 Rights Management Metadata	64
2.5.1 Rights Metadata Elements for User-oriented Rights Information	64

2.5.2 Rights-holder Communities' Metadata Activities	65
2.5.3 Open Digital Rights Language (ODRL)	70
2.6 Scientific Metadata	71
2.7 Metadata for Multimedia Objects	76
2.7.1 The MPEG Standards	76
2.7.2 MPEG-7	77
2.7.3 ID3v2	79
2.7.4 PBCore, the Public Broadcasting Metadata Dictionary	80
2.7.5 Ongoing Research and Development	80
2.8 Metadata Describing Agents	82
Suggested Readings	84
Exercises	84

## Part II. Metadata Building Blocks

---

Chapter 3. Schemas—Structure and Semantics	87
3.1 Elements	87
3.1.1 Knowing the Difference	88
3.1.2 Communicating About the Functional Requirements	90
3.1.3 Identifying Desired Elements	93
3.2 Element Set	93
3.2.1 Basic Components	93
3.2.2 Principles for an Element Set to Follow	99
3.2.3 Methods of Working from an Existing Element Set	101
3.2.4 Testing the Element Set	102
3.3 Value Space	103
3.3.1 Value Spaces That Should Follow Standardized Syntax Encoding Rules	103
3.3.2 Value Spaces That Require Standardized Vocabulary Encoding Schemes	105
3.3.3 Value Spaces That Should Have Predefined Lists of Terms	110
3.4 Application Profiles	112
3.4.1 APs Consisting of Elements Drawn from Other Schemas	112
3.4.2 APs Based on One Schema but Tailored for Particular Application Communities	113
3.4.3 APs Declaring Own Namespaces	116
3.5 Crosswalks	119
3.6 Best Practice Guides and Other Guidelines	122
3.6.1 Best Practice Guides	123
3.6.2 Standard-specific Guidelines	125
3.6.3 Community-oriented Best Practice Guides	126
3.6.4 Data Content Standards	127
Suggested Readings	128
Exercises	128
Developing a Metadata Element Set (a Multipart Project)	128

Chapter 4. Schemas—Syntax	131
4.1 Schema Encoding	132
4.2 Namespaces	136
4.3 XML Schemas for Metadata Standards	139
4.3.1 Dublin Core Encoding Schemas	140
4.3.2 EAD XML Schema	141
4.3.3 DLESE Metadata Framework XML Schemas	143
4.4 Summary	144
Suggested Online Readings	145
Exercises	145
Option 1: Create an XML Schema and Apply to Record Creation	146
Option 2: Create an XML Schema for the Option 1 Exercise	147
Chapter 5. Metadata Records	149
5.1 Basic Requirements	149
5.2 Conceptual Models	152
5.2.1 Metadata <i>Statement</i> , <i>Description</i> , and <i>Description Set</i>	152
5.2.2 Relationships Between Resources	153
5.2.3 Content-oriented Model for the Bibliographic Universe	155
5.3 Levels of Granularity	157
5.3.1 Item and Collection Records	157
5.3.2 Resource Decomposition	160
5.4 Metadata Sources	162
5.4.1 Manual Generation of Metadata	163
5.4.2 Automatic Generation of Metadata	163
5.4.3 Combination of Manual and Automatic Methods	165
5.4.4 Harvested Metadata Records	166
5.4.5 Converted Metadata Records	168
5.5 Encoding Metadata	171
5.5.1 Metadata Storage	171
5.5.2 Expressing Metadata in HTML/XHTML	181
5.5.3 Expressing Metadata in XML	187
5.5.4 Expressing Metadata in XML/RDF	190
5.6 Linkage, Wrapper, Display, and Parallel Metadata	193
5.6.1 Linking Between Descriptions for Different Resources	193
5.6.2 Wrapping	194
5.6.3 Encoding for Display	195
5.6.4 Encoding for Bilingual Metadata Statements	197
5.7 Combing Metadata Descriptions	199
5.7.1 METS	199
5.7.2 RDF	202
5.7.3 Aggregation	202
5.7.4 Conclusion	205
Suggested Readings	206
Exercises	207

## Part III. Metadata Services

---

Chapter 6. Metadata Services	211
6.1 What Are Metadata Services?	212
6.2 Infrastructure for Metadata Services	215
6.3 Metadata Registries	217
6.3.1 Purposes	217
6.3.2 Functional Requirements	218
6.3.3 Types	219
6.3.4 Essential Components	220
6.4. Metadata Repositories	224
6.4.1 Characteristics of Metadata Repositories	224
6.4.2 Introduction to the Harvesting Model	226
6.4.3 OAI-PMH Commands	228
6.4.4 Support for Multiple-record Formats in OAI-PMH	231
6.5 Ensuring Optimal Metadata Discovery	232
6.5.1 Metadata Retrieval	233
6.5.2 Metadata Exposure Methods	237
6.5.3 Other Approaches	240
6.6 Summary	244
Suggested Readings	244
Exercises	245
Chapter 7. Metadata Quality Measurement and Improvement	247
7.1 Quality of Metadata	247
7.2 Functional Requirements of Metadata Systems	249
7.3 Quality Measurement with Different Granularities	251
7.4 Measurement Indicators	254
7.4.1 Completeness	254
7.4.2 Correctness	255
7.4.3 Consistency	257
7.4.4 Duplication Analysis	259
7.5 Metadata Evaluation Methodology	262
7.6 Enhancing Quality of Metadata	263
Suggested Readings	266
Exercises	266
Chapter 8. Achieving Interoperability	267
8.1 Definitions	267
8.2 Metadata Decisions at Different Stages of a Digital Library Project	268
8.3 Achieving Interoperability at the Schema Level	269
8.3.1 Derivation	270
8.3.2 Application Profiles (APs)	271
8.3.3 Crosswalks	271

8.3.4 Frameworks	273
8.3.5 Metadata Registries	274
8.4 Achieving Interoperability at the Record Level	274
8.4.1 Conversion of Metadata Records	275
8.4.2 Data Reuse and Integration	276
8.5 Achieving Interoperability at the Repository Level	277
8.5.1 Metadata Repository Based on the Open Archives Initiative (OAI) Protocol	278
8.5.2 Metadata Repository Supporting Multiple Formats Without Record Conversion	279
8.5.3 Aggregation and Enriched Metadata Records in a Repository	279
8.5.4 Element-based and Value-based Crosswalking Services	280
8.5.5 Value-based Mapping for Cross-database Searching	281
8.5.6 Value-based Co-occurrence Mapping	282
8.6 Conclusion	284
Suggested Readings	284
Exercises	285

## **Part IV. Metadata Outlook in Research**

---

Chapter 9. Metadata Research Landscape	289
9.1 Research in Metadata Architecture	290
9.2 Research in Metadata Modeling	292
9.3 Research in Metadata Semantics	294
9.4 Conclusions	297
Suggested Readings	298
Exercise	299

## **Appendices: Sources and References**

---

Appendix A. Metadata Standards	303
Appendix B. Value Encoding Schemes and Content Standards	313
Standardized Vocabularies	313
Subject Headings Lists and Thesauri	314
Classification Schemes	315
Name Authority Lists	316
Content Standards and Best Practice Guides	316
Glossary	319
Bibliography and Sources of Further Information	327
Index	355
About the Authors	365
