<i>About the authors</i>	<i>xxxvii</i>
<b>1 Digital library economics: the environment</b>	<b>1</b>
<b><i>David Baker and Wendy Evans</i></b>	
Introduction	1
Defining the digital library	4
Hybrid approaches	7
Digital library strategies	8
Digitisation	9
Archiving and preservation	10
Repositories	12
Open access	14
Copyright	18
The potential	19
Other benefits and value added elements	21
The end user	23
Culture change	25
Conclusion	27
Note	28
References	28

<b>2</b>	<b>Digital library economics: the key themes</b>	<b>31</b>
	<i>David Baker and Wendy Evans</i>	
	Introduction	31
	The cost of digital libraries	31
	Assigning cost and value in the digital library	35
	Funding	38
	Pricing	42
	Economic models	46
	Sustainability	47
	Collaboration	50
	Conclusion	53
	Note	53
	References	53
<b>3</b>	<b>A history of digital library economics</b>	<b>57</b>
	<i>Reg Carr</i>	
	Times of ignorance ...	57
	Recognising the need for research	58
	'Learning by doing': the United States	61
	'Learning by doing': the United Kingdom	63
	Conclusion	65
	Notes	67
	References	69
<b>4</b>	<b>Digital library economics: aspects and prospects</b>	<b>71</b>
	<i>Derek Law</i>	
	Introduction	71
	Business plans	72
	Library costs	74
	The components of the digital library	74
	Digital library collections	76
	Digital content	77

Digital library staffing	79
User support, kitemarking and trust metrics	81
The estate	82
Administrative costs and income	82
Conclusion	83
Notes	84
References	84
<b>5 Journal publishing: implications for a digital library policy</b>	<b>87</b>
<i>Robert Campbell and Edward Wates</i>	
Introduction	87
Background	87
The rise, fall and rise in circulation	89
The costs of publishing	90
The challenge	94
Is open access the answer?	97
Savings in the scholarly communication system	100
Conclusion	102
Notes	103
References	103
<b>6 Hybrid library management</b>	<b>105</b>
<i>Jean Sykes</i>	
Introduction	105
Collection building	107
Resource allocation	112
User behaviour	115
Conclusion	116
Notes	117
References	117

<b>7</b>	<b>Digital library economics: international perspectives</b>	<b>119</b>
	<b>I The Australian perspective</b>	<b>119</b>
	<b>Warwick Cathro</b>	
	Introduction: definition and scope	119
	Australian work on economic models	120
	Digital libraries in Australia	121
	Digitisation	122
	Web archiving	123
	University repositories	125
	Collaboration and standards	126
	Conclusion	127
	Notes	129
	References	129
	<b>II The German perspective</b>	<b>130</b>
	<b>Rafael Ball</b>	
	Introduction	130
	Approaches to defining a digital library	131
	How did it start? Digital library initiatives in Germany	131
	Selected digital library projects and initiatives	137
	Conclusion	142
	Notes	143
	References	144
	<b>III The Dutch perspective</b>	<b>145</b>
	<b>Bas Savenije</b>	
	Introduction: the landscape	145
	A short history of innovation	146
	Towards digital collections	147
	Open access	150
	Relationship to research and teaching	153
	Organisational consequences	155

Conclusion	157
Notes	158
References	158
<b>8 E-journals and e-books</b>	<b>161</b>
<i>Hazel Woodward and Fytton Rowland</i>	
Introduction	161
Acquisition of e-journals	162
The open access movement	165
The acquisition of e-books	167
The costs of providing access to e-journals	172
Conclusion	173
Notes	173
References	174
<b>9 Digitisation – trends in the economics of retro-conversion</b>	<b>177</b>
<i>Stuart Dempster and Catherine Grout</i>	
Introduction	177
The development of digitisation	177
Public investment	178

Projecting the costs: some examples	180
The budgetary black hole	184
Impact of format issues	185
Examples of costing models	185
Sustainability models	187
Conclusion	190
Notes	190
References	191
<b>10 To be or not to be: prospects for document supply in the digital library</b>	<b>193</b>
<i>Mike McGrath</i>	
Background	193

Document supply and the hybrid library	195
Terminology and definition of document supply	197
The current environment for document supply	197
The publishers	203
Document suppliers	204
Copyright and digital rights management	207
Conclusion	208
Notes	209
References	209
<b>11 Cost-effective decision-making in collection building</b>	<b>211</b>
<i>Lorraine Estelle</i>	
Introduction	211
Strategic assessment	212
Business assessment: price and usage	213
Business assessment: financial models	216
'Big Deal' or not?	217
Print versus e-books	219
Print versus e-reference	221
Licensing evaluation	221
Benefits assessments	222
Conclusion	223
Notes	224
References	224
<b>12 Spinning the disks - lessons from the circus</b>	<b>227</b>
<i>John Robinson</i>	
Introduction	227
Spinning plates	228
Before the digital library	229
The advent of the digital library	230

Access infrastructure	231
Resource infrastructure	236
Keeping 'safe' copies of important material	237
Functionality, complexity, sustainability	238
Sustaining the infrastructure	240
Collective solutions for collective problems	241
Keeping the spinning disks aloft	243
Conclusion	244
Notes	245
References	246
<b>13 The CREE project: a case study on the novel delivery of search-related library services and its economic implications</b>	<b>247</b>
<i>Chris Awre and CREE staff at the University of Hull</i>	
Introduction	247
Why CREE?	247
Models for delivering search-related resources	249
The CREE project	253
The impact of CREE	257
What does the future hold?	261
Notes	262
References	263
<b>14 The economics of copyright</b>	<b>265</b>
<i>Hugh Look and Alicia Wise</i>	
Introduction	265
Why copyright came to exist	265
The public domain	267
How it works financially	268
Licensing	272
Issues for publishers	273
Issues for libraries	274

Looking ahead	282
Conclusion	286
Notes	288
References	289
<b>15 The economic future for digital libraries: a 2020 vision</b>	<b>291</b>
<i>Simon Tanner</i>	
Introduction	291
Technology trends	292
Ambient intelligence	293
The environment	294
Managing containers, content and context	294
Economic barriers in relation to context management	297
Financial sustainability	299
Collaboration	300
Open source	302
Open access	304
Digital divide	305
Conclusion	306
Notes	308
